TASK 1

Given a list with duplicate elements, write a function to remove duplicates and return the same list with unique elements.

TASK 2

Given a dictionary, write a function that takes a string as an input and returns a dictionary with words as keys and their frequencies as values.

TASK 3

Given two tuples, concatenate them to form a new tuple.

TASK 4

Given a list of integers, write a function that returns the sum of all even numbers in the list.

TASK 5

Write a function that takes a string as input and returns True if it is a palindrome (ignoring case and spaces), otherwise returns False.
